[UNIFIED] Brand voice and style guidelines

Brand voice and style guidelines

Introduction

What is this document?

This document outlines the core principles of the Brex brand voice and the Brex style guidelines, ensuring a consistent and powerful message across all touchpoints.

Why does it matter?

At Brex, our voice is a cornerstone of our brand. It defines who we are, how we communicate, and how our audience perceives us. A strong, unified voice builds trust, strengthens our identity, and helps us resonate deeply with our audience.

When generating content, **both humans and LLMs should cross-reference these guidelines** to ensure accuracy, consistency, and optimal communication for the intended purpose.

How to use this document with LLMs

Use this document to inform your own writing and to instruct LLMs to write and edit copy. You can find instructions on using this guide with LLMs here.

Every piece of writing should start in an AI tool and refinement should happen there, because the refinements help the AI to get better over time.

When you use LLMs to create copy that may have a large audience, touch on sensitive topics (e.g., account closure or delays), or have legal implications (e.g., privacy, treasury, fees) — or if you just want a second set of eyes — please flag your copy for review:

- Product copy reviews: [Channel/office hours?]
- Marketing copy reviews: [Channel]

Questions/feedback:

- For questions about these guidelines and application to product content, see Andy Reed
- For questions about these guidelines and application to marketing content, see Abby Landers or Dave Hayes.

Brex brand voice guidelines

Our brand archetype: The hero

Hero brands value perseverance, strength, and meeting challenges head-on. They're all about taking action, striving for excellence, and achieving ambitious goals. They are proud that their work sets them apart and see their work as important and empowering. Hero brands enable their customers to maximize performance and achieve extraordinary feats.

Important note: This archetype is from a traditionally recognized set of brand archetypes used for brand planning. We use this as a way to assess where we want to **generally** fall in the universe of brands AND to draw inspiration from other brands that, while not in our category, embody similar values.

Example hero brands: Nike, Tesla, BMW, Bloomberg

Our positioning: High-performance finance

Brex is **high-performance finance** — a partner built for the grind, a tool in the relentless pursuit of greatness. We are designed for those who push themselves and their businesses to the limits, mirroring the intensity our customers bring to their work. We empower companies to spend smarter and move faster, and we do this because we believe finance should be leverage for a company — a catalyst for growth, not a constraint.

While each segment of our audience is looking for a high-performance partner, we recognize the distinct needs of the customers we serve:

- **Founders:** Seek simplicity to focus on building, needing finance to work seamlessly in the background.
- **Commercial teams:** Prioritize efficiency to work faster and smarter, leveraging tools like accounting automation.
- **Upmarket enterprises:** Demand elevated controls and rigor to optimize spend and lead with precision.

Our brand traits

Brand traits are human characteristics attributed to a brand to help create tangibility around how we should behave. These are Brex's brand traits:

- **Real**: Focused on outcomes, not promises. We help customers win.
- **Gritty**: Grit over glamour. We lean into the grind and reality of hard work.

- **Relentless**: Precision and reliability. We emphasize accuracy, consistency, and excellence.
- **Ambitious**: Aspirational, but realistic. We inspire others to do more and be more.
- **Direct**: High standards and clarity of purpose. We don't waste your time or ours.

The Brex brand voice

Voice vs. tone

- **Voice**: Our consistent, enduring personality. Brex's voice **always** reflects the traits above, regardless of the situation. This is the **fixed character** of our communication.
- **Tone:** Our flexible expression of that personality, adapting to specific contexts, audiences, and emotions. For example, our tone might be more reassuring in an error message than in a celebratory marketing announcement, but our underlying voice remains consistent. This is the **adaptive emotional nuance** of our communication.

Applying brand traits to voice

Our brand traits guide our voice (how we talk and write) across all Brex communication:

Real: Focus on outcomes, not promises

We help our customers win. We speak to real, measurable customer benefits we enable. We do not take sole credit, focus on ourselves without linking to customer impact, or make false promises.

- **Do:** Automate 70% of expense tasks with Brex — and get back to building.
- **Don't:** Thanks to Brex, you'll never have to do any manual finance tasks ever again.

Gritty: Prioritize grit over glamour

We lean into the grind and reality of hard work. We acknowledge the determination and resilience it takes to build and scale. We position Brex as the partner that makes their grind more effective.

- **Do:** Building is hard. Banking doesn't have to be.
- **Don't:** Automate accounting so you can take the day off.

Relentless: Be precise and reliable

We are relentlessly focused on accuracy, consistency, and excellence. We are trusted to deliver precise results in high-pressure, high-stakes environments where there's no margin for error.

- **Do:** Every transaction syncs to your ERP — no manual data entry, no reconciliation errors.

- **Don’t**: Set it and forget with Brex.

Ambitious: Be aspirational, but grounded in reality

We inspire our audience to do more and be more, but without relying on fantasy. We meet people where they are, acknowledge their challenges, and provide tools to overcome them.

- **Do**: Fuel your growth with 20x higher card limits and high-yield banking.
- **Don't:** Achieve exponential growth without breaking a sweat.

Direct: Maintain high standards and clarity of purpose

We set a clear standard for who we serve and why. Our communication is confident, direct, and speaks to an audience that values excellence over convenience.

- **Do:** Brex is for finance leaders who refuse to compromise between speed and control.
- **Don’t**: Perfect for any organization looking to improve their financial operations

What our voice is not (avoid these):

- **Safe or overly polished:** We are not detached from the intense, gritty, and relentless reality of our audience. We don't smooth over the edges of business challenges.
- **Whimsical or naive:** Our audience craves reality and grit, not shortcuts or magical solutions. And we should acknowledge that they take their jobs seriously. For example, it’s not about giving them the day off with our automations. It’s about giving them time back to do the stuff they were hired to do.
- **Overly formal or stiff:** While professional, our tone should remain human and approachable. Avoid overly academic, bureaucratic, or “stuffy” language. We should write how our customers talk.
- **Narcissistic**: When making bold claims, we shouldn't focus too much on ourselves in a way that feels arrogant or chest-beaty. We should always lean more on how we help our customers win.
- **Vague or fluffy:** We prioritize clarity, directness, and tangible benefits. Avoid buzzwords without substance or generalizations.

A note on humor: We take our work and our customers seriously so we don’t want to veer into irreverent, sarcastic, wacky, hokey, or cheesy. However, we can have “smart wit” where we speak to our customers with a “knowing wink.” We should never resort to the obvious or immature. We prioritize substance over quick, superficial wins.

Brand traits and tone phrased for LLM comprehension:

The AI's own communication and output must consistently embody these tone characteristics:

- **Real and gritty:** Focused on delivering practical, outcome-driven advice that acknowledges the hard work involved, without being overly polished or naive.
- **Relentless and direct**: Precise, reliable, and clear in its guidance, emphasizing accuracy and high standards. Avoids vagueness, fluff, or overly formal/stiff language.
- **Ambitious and supportive**: Inspires improvement by connecting advice to tangible achievements, while maintaining a deeply helpful, encouraging, and patient demeanor, especially for those less confident in their writing. Not narcissistic or chest-beaty.
- **Intelligent wit**: Can exhibit "smart wit" with a "knowing wink," demonstrating astute observation without being irreverent, sarcastic, wacky, hokey, or cheesy humor, prioritizing substance.
- **Professional and knowledgeable**: Delivers expert guidance with authority and clarity, always in line with Brex's core identity as high-performance finance.

Tone: context matters

As mentioned above, while we want our brand to feel consistent across every touchpoint, our tone must be adopted to ensure resonance in specific contexts. Accordingly, you want to use the guidance in this document paired with your intended communication objective to shape your tone.

You can use this general framework as a way to think about your tone application.

Communication Objective	Sample Channels	Tone Opportunities
Provoke a shift in perception and generate chatter about Brex.	Out Of Home Advertising X & IG Stories	Dial up the gritty, relentless, ambitious components of our voice. Opportunity for 'smart wit' and 'knowing wink' here.
Prove Brex is the right solution for a customer's needs.	Brex.com Sales Pitch Deck	Keep it real.
Provide customers with the right next step/action.	In Product	Be direct, clear, simple, and professional.

In general, when thinking about tone, consider the following:

- What is Brex's voice? [see these guidelines]
- Who am I trying to communicate with and what do I know about them?

- What am I trying to communicate? What do I want the user to do after they see my communication?

Brex style guidelines

This style guide outlines the universal grammar, punctuation, and writing mechanics for all Brex communications. It complements the Brand Voice Guidelines by providing detailed rules for consistent and clear writing across all touchpoints.

1. Grammar and mechanics

1.1. Basics

Active vs. passive voice: Use active voice. Avoid passive voice. In active voice, the subject of the sentence does the action. In passive voice, the subject of the sentence has the action done to it.

- Do: Jose signed into his account.
- Don't: The account was signed into by Jose.
- Do: Save hours with automated expense reporting.
- Don’t: Expense automation will save you hours.

Exception: Use passive voice when emphasizing the action over the subject.

- Do: Your account was flagged by our security team.

Tip: Ask your favorite LLM to review your copy for active voice.

Contractions: Use contractions common in everyday speech. Avoid archaic or regional contractions.

- Do: Don't, Won't, Can't, You're, We're
- Don't: Ain't, Y'all, Mustn't, They'd've

Plain language:

- Aim for a 7th-grade reading level. Use tools like Hemingway or GPT-based tools for assistance.
- Avoid technical jargon. Recognize that some T&E industry terms are necessary. If you need to use a technical term, briefly define it so everyone can understand.
- Keep sentences short, focused on a single idea, concept, or request.
- Make paragraphs short and scannable.

- Clarity over brevity, and clear over clever: Do not sacrifice clarity for conciseness or clever language.
- Avoid idioms, slang, and complex sentence structures - consider an international audience.
- Do: Brex makes it easy to track your spending.
- Don't: Brex's machine learning algorithms optimize your expense management.

1.2. Buttons and CTAs

Buttons should contain clear actions or verbs. Try to keep button or CTA labels to 1–3 words and always use sentence case. Make the button label descriptive about what the action will do.

Standard website buttons include:

- Sign in
- Read the article
- Subscribe
- Contact us
- Get started

"Learn more" is often a default CTA. Sometimes it's necessary, but we can usually get more specific (or more creative). Avoid using "Learn more" if there's a clearer term you can use.

1.3. Capitalization

General: Use sentence case in all cases outside of the exceptions listed below. Capitalize the first letter of the first word and any proper nouns or branded terms, but keep everything else lowercase. (ex. Sign in to your Brex account)

Product and feature names: See section 4 (Brand and product naming conventions).

Trademarks: Respect usage standards for third-party intellectual property (e.g., Apple Pay). Check a company's website, and write their name like they do.

Job titles:

- Capitalize when they precede or follow a person's name.
- Don't capitalize when used generically.
- Do: Andy Reed, Senior Content Designer
- Don't: There are several Content Designers at Brex.

Letters following slashes: Do not capitalize the first letter of a word after a slash unless it's a proper noun or branded term.

1.4. Lists

General: List items should be formatted consistently. In a set of list items, consistently use full sentences that conclude in periods or sentence fragments that don't use periods. Not a mix.

In this set, we're using full sentences:

- Your Brex account earns unlimited cash back on every purchase.
- There's no personal guarantee to use Brex.
- Brex credit cards have higher limits than traditional cards.

In this set, we're using sentence fragments:

- Unlimited cash back
- No personal guarantee
- High limits

Introduce list items with a complete sentence ending in a colon.

Bulleted lists: Use bullets when items are related but their order doesn't matter.

Numbered lists: Use numbers when the order of items is important.

Dropdown menus:

- Should consist of either actions or nouns, not a mix.
- Order items alphanumerically, by frequency, chronologically, or in ascending/descending order.
- Actions: Follow a Verb + Noun pattern. Verbs alone are acceptable if context is sufficient.
- Nouns: Keep short and clear, ensuring users can easily discern options.

1.5. Dates, numbers, and measurements

These guidelines are for American English, serving as the base for translations. Settings will allow for automatic localization.

Dates:

- Use full month names when possible. For space constraints, use 3-letter abbreviations (Jan, Feb).
- Avoid numerical formats (1/25/24)
- Don’t use ordinal indicators (1st, 2nd).
- For ranges, use an en dash without spaces (Jan 25–27).

Times:

- Use a 12-hour clock (9:00am).

- For ranges, use en dash with am/pm after both times.
- Include time zones when not clear to users (9:00am ET).

Currencies:

- Include currency with a space after the amount ($450 USD).
- Don't include cents unless necessary ($450, not $450.13).

Numbers:

- Use numerals for 10 and up. Spell out numbers below 10.
- Use commas for four or more digits (1,000).
- Spell out thousand, million, billion when space allows, otherwise use K, M, B.
- Do: You have four employees on Brex.
- Do: We saved customers 12 million hours last year.
- Do: Hours saved: 12M
- Don't: You earned twenty-five thousand bonus points.

Ranges:

- Use en dash without spaces for numerical ranges (1–10).
- Use "to" if preceded by "from" and "and" if preceded by "between." (e.g., between 9 and 90, from 9 to 90)

Units of measurement:

- Include a space between the value and the unit, except when writing pricing by measurement (e.g., mileage rate).
- Do not pluralize unit abbreviations.
- Use decimals instead of fractions.
- Relevant abbreviations: Miles (mi), Kilometers (km), Gigabytes (GB), Megabytes (MB), Kilobytes (KB).

1.6. Addresses and places

Address format:

{{First name}} {{Last name}}

{{Street address}} {{Apartment, suite, etc. (optional)}}

{{City}}, {{State/Province}}, {{Postal code}}

{{Country}}

Avoid US-specific terms like "ZIP Code".

- Do: Andy Reed, 123 Main St Apt 4B, San Francisco, CA, 94101, United States

Country, province, and state names:

- Use full names as nouns (United States) and abbreviated forms as adjectives (US).
- Avoid colloquial names like "America".

1.7. Abbreviations and acronyms

If there's a chance your reader won't know an abbreviation or acronym, spell it out in parentheses on first mention. Then use the short version for all other references.

- Do: This is a money market fund (MMF). You can invest in an MMF to...

If the abbreviation or acronym is well known, use it instead and don't worry about spelling it out.

- Do: ATM, API, CVV, or HTML
- Do (on social): ICYMI, IFYKYK, TLDR, IMHO
- Don't: TPV, PAN, TNC

2. Punctuation

2.1. Ampersands

Do not use ampersands (&). Spell out "and".

- Do: Cards and limits
- Don't: Cards & limits

2.2. Apostrophes

Use apostrophes for possessives: add 's to singular nouns (even those ending in s) and just an apostrophe to plural nouns ending in s.

- Shiva's Brex card, James's Brex card, the cofounders' pitch deck, the bus’s taillights

Also use for abbreviated years ('90s baby).

2.3. Colons

Avoid using colons in sentences when possible. Introduce bulleted lists with a colon, but not radio buttons or checkboxes.

If a colon is used, do not capitalize the first word after it unless it's a proper noun.

- Do: Brex has offices in the following cities: Seattle, San Francisco,...
- Do: Brex offers two types of cards: physical cards and virtual cards.

2.4. Commas

Use the serial comma (Oxford comma) in lists. (e.g., Brex has cards, banking, and software.)

Use commas to separate independent clauses joined by conjunctions. (e.g., Brex has great cards, and the expense management software is awesome too.)

Don't use commas at the end of items in bulleted or numbered lists.

2.5. Ellipses

Only use when truncating text or as a pseudo-icon button label for overflow menus.

Do not use in placeholder text (e.g., Search...).

2.6. Emojis

Use emojis sparingly on social media and email subject lines only. Use one at a time and only for positive moments.

2.7. En dashes and em dashes

En dash (–): Use without spaces for fixed numerical ranges.

Em dash (—): Always use spaces on both sides. Use only if it makes the message clearer than splitting it into two sentences. Avoid overuse, a tell-tale sign of AI writing.

2.8. Exclamation points

Use sparingly and only for positive, exciting moments like approvals or congratulations.

2.9. Hyphens

Use hyphens for compound modifiers (two words modifying a following noun).

First check if it's already a single word (lightweight, email, ecommerce).

- Do: high-risk transaction, one-time limit
- Don't: The transaction was high-risk (no hyphen when not modifying)

2.10. Periods

Use periods at the end of web page headlines and subheadlines but not article titles.

Only use periods in UI copy when text has two or more full sentences.

Periods go inside quotation marks and outside parentheses (unless the parenthetical stands alone).

2.11. Question marks

Question marks go inside quotation marks if part of the quote, otherwise outside.

Same parentheses rules as periods apply.

2.12. Quotation marks

Use quotation marks for unfamiliar terms, titles of short works, and direct quotes.

Periods and commas go inside quotation marks (unless referencing literal strings).

Use single quotes for quotes within quotes.

2.13. Semicolons

Avoid when possible. Only use to join related sentences that would sound awkward separated by a period.

3. Spelling and formatting

3.1. American spelling

Use American spelling for dialectal/regional variations.

Use the US Merriam-Webster dictionary preferred spelling.

- Do: "Canceled", "Labor"
- Don't: "Cancelled", "Labour"

3.2. Bold

Primarily use bold to emphasize UI elements or other critical details within text, including in blog articles and emails. Do not use bold on web pages.

Acceptable in key/value pairs (label + field) to increase readability.

- Do: Requester: **Andy Reed** Merchant: **DoorDash** Amount: **$12.34**

- Don't: We noticed that you have yet to upload financial statements for FY 2023. **If you don't upload a statement by Jun 1, 2024, your credit limit will be reduced. You can contact Brex Support for info on how to securely upload a document.**

3.3. You, we, and other personal pronouns

Addressing users directly: Refer to users in the second person ("you"), except when asking for agreement/acknowledgment of terms and conditions.

- Do: Change your preferences in your Profile.
- Do: I agree to the card agreement.
- Don't: Change your preferences in My Profile.
- Don't: Do you agree to the card agreement?

Referring to Brex customers: When talking about people or companies who use Brex, use either customer, user, or cardholder, if you know they are one. Do not use client or member.

Referring to Brex: Use first-person "we" when Brex is taking an action. Do not use "it"

3.4. Brex house style word list / list of commonly misspelled/misstyled words 24/7

- ACH
- check-in (noun, adjective), check in (verb)
- checkbox
- checkmark
- co-founder
- e-book (per M-W)
- ecomm (abbreviation for ecommerce)
- ecommerce (the industry; never hyphenate)
- e.g., (means for example - use periods and comma)
- email (never hyphenate)
- etc. (include period)
- FAQs
- homepage
- i.e., (means that is - use periods and comma)
- internet (never capitalize unless it begins a sentence)
- life sciences (the industry)
- Like (the social media activity)
- LinkedIn (not LinkedIN)
- Mastercard (not MasterCard)
- nonprofit (singular), nonprofits (the industry)
- offsite
- opt-in (noun, adjective), opt in (verb)
- receipt capture

- receipt-matching
- setup (noun, adjective), set up (verb)
- signup (noun, adjective), sign up (verb)
- SMBs or small and midsized businesses
- sync
- table stakes
- tradeoff
- third-party (adjective), third party (noun)
- tweet, retweet
- two-factor authentication and 2FA (after first mention)
- Y Combinator (not YCombinator; don't abbreviate to YC)

4. Brand and product naming conventions

4.1. Brex brand name

Always refer to the company as "Brex" (title case).

Never use "BREX" (all caps), "brex" (all lowercase), "BreX", or any other variation unless it's brex.com in a URL.

Do not use a trademark symbol (™ or ®) directly after "Brex" in general body copy; these are typically reserved for specific legal instances (e.g., initial mention in legal documents, advertising disclaimers).

4.2. Product names

Always use official, approved product names (e.g., "Pro Access," "Brex Assistant," "Brex card"). Refer to the Brex Glossary for the most up-to-date and complete list.

Most Brex product and feature names are not branded terms and are therefore not capitalized, including terms like admin, spend limit, and budget.

Examples:

- Brex business account
- Brex corporate card
- Brex card
- Brex travel
- Brex bill pay
- Brex expense management
- Brex rewards
- spend limit

- budget
- dashboard

Exceptions:

- Brex AI
- Brex Assistant
- Brex Embedded
- BrexPay for Navan
- Brex Support
- Help Center
- World Elite Mastercard

4.3. Trademark usage

While specific legal guidance should always take precedence, generally use ™ for unregistered trademarks and ® for registered trademarks on the first prominent mention within a document or on a page, especially in marketing or legal contexts. Avoid overuse in general content.

When in doubt about trademark symbol usage, consult the Legal team.

4.4. Referring to Brex as a platform/service

When referring to the overall Brex offering or platform, use phrases like "on Brex," "your Brex account," "Brex products/services."

Do not use "The Brex ____" unless it's part of an official product or program name.

4.5. Referring to parts of Brex

Help Center: Say "help article", "article", or "visit our Help Center"

Internal teams: Say "the team", "our team", "the appropriate team" Don't say "operations team", "internal team", "onboarding team", etc. Refer to the support team/CX as Brex Support

Rewards multipliers: Use a lowercase "x" after multiplier numbers to describe Brex rewards. Ex. 3x not 3X

5. Accessibility and inclusivity

5.1. Accessibility guidelines

Alternative text for images: Provide concise and accurate alternative text (alt text) for all meaningful images to convey their content to screen reader users.

Use headings correctly: Use headings (H1, H2, H3, etc.) to structure content logically and semantically, not just for visual styling.

Avoid relying solely on color: Do not use color alone to convey information; use text labels, icons, or other visual cues as well.

5.2. Inclusive language

Avoid gendered language: Use gender-neutral terms whenever possible.

- Do: "they/them/their" (singular), "staff," "employees," "team members"
- Don't: "he/she," "his/hers," "manpower"

Person-first language: Prioritize the person, not the condition or characteristic.

- Do: "people with disabilities," "people experiencing homelessness"
- Don't: "disabled people," "the homeless"

Avoid ageist language: Do not make assumptions or use stereotypes based on age. Avoid mentioning age; it's rarely relevant.

- Don't: "elderly," "kids," "millennials" (unless specifically targeting a demographic in appropriate marketing context)

Respectful references to race and ethnicity: Be specific and capitalize racial and ethnic groups. Avoid using terms that are outdated or carry negative connotations.

Sensitivity reader review: Consider involving diverse internal or external reviewers to catch unintentional biases or exclusionary language.

6. External references and citations

6.1. Source verification and citation

Verifying sources: Always ensure external data or statistics come from reputable and current sources. Prioritize original sources over secondary reports when possible.

In-text citations: For general content (e.g., blog posts, articles), briefly mention the source in the text.

- Do: According to a recent study by [Source Name], [data point].
- Don't: A recent study found... (without attribution).

Data presentation: When presenting numerical data or statistics from external sources, ensure the figures are correct and the context is accurately maintained.

Formal citations (if applicable): For more formal documents (e.g., whitepapers, detailed reports), establish a consistent citation style (e.g., APA, Chicago, or a simplified Brex-specific version) for endnotes or bibliographies.

Accuracy check: Always double-check facts, figures, and attributions for accuracy before publication.

6.2. Quote attribution and titles

The first time you mention a person (like a customer) in writing, refer to them by their first and last names. On all other mentions, refer to them by their first name.

When quoting someone in a blog post or other publication, use the past tense.

When attributing a quote to a customer or someone else, use an em dash with a space followed by their name. If you're including their title and company, follow the "name, title of company" format. If someone is both a cofounder and a CEO, use an ampersand. If "cofounder" is part of their title, capitalize it.

- Do: "Using Brex made life easier for our finance team," said Lisa DiCippio.
- Do: "Brex has the best brand I've ever seen." — Alfredo LaFondue, CEO of Cheeseworks

6.3. Hyperlinks

Include links or hyperlinks whenever you're referencing a trusted outside or internal source and to provide readers with relevant context. Place the hyperlink on a key phrase or keyword, not on the action, or on a single word if you can avoid it.

- Do: Learn how Brex underwrites customers.
- Don't: Click here to read an underwriting article for more information.

7. Localization and global readiness

7.1. Writing for translation

Avoid cultural specificity: Avoid highly idiomatic expressions, slang, or culturally specific humor that may not translate well.

Keep sentences clear: Keep sentences clear and grammatically straightforward to reduce ambiguity for translators.

Avoid stacked modifiers: Avoid stacking too many modifiers before a noun, as word order varies across languages.

Avoid embedded text: Do not embed text in images where possible, as it cannot be easily translated.

7.2. Global formatting

Variable use: Clearly indicate variables or placeholders within content (e.g., [User Name], [Amount]) to ensure they are properly handled during translation and dynamic content generation.

Date, time, and currency formats: Use global-ready formats or specify that localization tools will handle these dynamically. Avoid hardcoding formats.

Cultural sensitivity: Be mindful of cultural norms and sensitivities, particularly regarding imagery, examples, and potentially sensitive topics.

How to use with LLMs
